Vision and Leadership

Oregon has operated for more than thirty years with a vision and leadership that did not consider the long term effects of what they were doing on behalf of the people of this State. A Niemeyer Administration will rise to the incredible challenge of rebuilding our schools, rebuilding our jobs, and rebuilding trust in our Government that we all so desperately want.

Bring Logic and Sensibility to Government

I will stop unnecessary taxes and regulations on both the people and business across this State. Too many taxes are based on false science, cronyism, and incompetence. We must get a budget that makes sense and adds up to reality. We must decrease the size of Government and stop the waste of tax dollars that go along with bureaucracy.

Get our Natural Resources back to work again

We can market Oregon Products all over the world. I will get government out of the way of business across this State and get *all* of Oregon's counties back to work.

Oregon's Revenue is *our* Money – It's precious to the People

Many people have come to me with an idea or a product and their Life's Savings to start a future for themselves. I will treat Oregon's tax dollars just as if they were the people's life savings. Dollars are not to be wasted on useless projects and pointless efforts.

The Oregon Constitution has been ignored for far too long

The Oregon Constitution has specific guidelines such as dedicated revenues for our roads or Lottery Dollars for economic development. What ever happened to funding education first?

PERS and Oracle

The problem this State is facing with the unfunded mandates of PERS started as far back as 1975. As Governor, I will track down where the PERS dollars are and get the money into the hands of competent people that will tell the truth about what is left. And the truth about what happened to the Oregon Health Care system and Oracle will be known to all.

"Accountability is only possible with competence"

I will place the most competent and most productive people in charge of the various different responsibilities of Government and personally believe there will be no shortage of honest and qualified people to fill the positions in my administration.

We have the technology, we have the resources, we have the opportunity, and most certainly, we have the need to get Oregon back on track to a future of safety, prosperity, and growth that will benefit us all for many years to come. Please join Bob Niemeyer in this incredible task of getting responsibility, accountability, and trust back into the Government of Oregon.
